

Splunk Enterprise Deployment

rSolutions Professional Services

Overview

This premium service leverages our Splunk experts to support and expedite Splunk Enterprise deployment. Your new Splunk production environment will be designed and deployed to be easy to maintain, scalable and aligned with Splunk best practices.

Enterprise Deployment Includes:

Splunk Core Deployment

We'll work with you on infrastructure design, installation, app deployment, data collection and onboarding using management best practices framework implementation.

Data Onboarding, Assistance and Training

From data output to forwarding, we'll help your team make sense of it all. Our Splunk experts will be there step-by-step ensuring that every process set up is clear and repeatable. For common data sources we can provide additional tools to help expedite onboarding.

Forwarder Configurations and Deployments

We will design and deploy forwarders with centralized configuration management via Splunk Deployment Server.

Deploy Splunk Apps

The quickest way to get up and running on a number of common use cases is to deploy Splunk Apps. Our Splunk Professional Services will help with the deployment of apps fitted to your business need.

User Experience

Our engineers will help customize user dashboards, as well as make recommendations to gain the best results from data analysis. Our team will provide walkthroughs showing your staff how to build queries and create relevant charts and reports. We'll also configure alerts and custom reports that reach users without directly accessing Splunk.

Deployment Documentation

Complete documentation including designs and configurations will be provided to ensure you understand how to manage, support and get the most value from your Splunk environment in the future.

Enterprise Deployment Service Benefits:

- > **An Expedited Deployment:** We'll collaborate with you every step of the way. Get on the latest version of Splunk and start realizing value quickly.
- > **Expert Guidance and Training:** Your staff will be taught best practices and be knowledgeable on all that Splunk has to offer before we are through.
- > **Agile Architecture Built For Growth:** Ensure your Splunk Enterprise architecture is ready for all the data you can throw at it today and tomorrow.
- > **Reliably Onboard Data:** Gain the most insight from your data by aligning your on-boarding with best practices implemented by rSolution's Splunk engineers.
- > **Work Side-by-Side With Splunk Experts:** Should any issues arise, our team has a wide range of solutions at the ready.
- > **Faster Time to Value and Increased Return on Investment:** Our services save time and hassle in deployment, ensure complete use of the software from day one.
